

Fire Safety & Precaution Drill Programme

Our school has organised Fire Safety and Precaution Drill Program which was conducted by station officer (TPT) SSO. John Vins K.G. This programme aimed at teaching the children proper procedures for evacuating the building in a real life fire or emergency. This provides a valuable opportunity for teachers and students during their toughest time. At a minimum, the fire prevention plan must include, a list of all major five layers, proper handling and storage procedures for hazardous materials, potential ignition sources and their control and the type of fire protection equipment necessary to control each major hazard. This was very useful for students and teachers.

Republic Day Celebration

The Pioneer School marked the 73rd Republic Day celebration with much patriotism and a great zest at the school. Our honourable and beloved Correspondent Madam hoisted the National Flag with Patriotic fervour. The Principal and teachers were indeed delighted to be in school for hoisting the National Flag.
